

THE EMPIRE CELEBRATES LIONS, TIGERS AND BEARS

Dan Tate, Ph.D.

A. Gabriel Federation Starfleet Command as a Wildlife Planet

The name of this planet is *Gabriel Federation Starfleet Command*. It is one of thirty-seven of the *Gabriel Federation*. The latter is a moral authority only cosmic government. It passes no laws and enforces no legislation. U.S. Air Force *Project Blue Book* calls Starfleet Command a *life modification sphere*; a wildlife planet. Today we have national parks as wildlife reserves.

Likewise, the cosmic government designates some planets [every tenth one] as wildlife preserves. This is one of them. The *Second Coming* will convert it from an evolutionary planet into an *eternal architectural sphere*. Thus, Starfleet Command will *forever be a wildlife sphere*.

The people world-wide must decide how to co-exist with wild animals. They will have to manage the environment for the best of all. One way to accomplish this is via voluntary public service. Gabriel Federation has *ten cosmic by-laws*. The following is number eight.

Five Years Public Service for everyone

Every adult is asked to volunteer for five years in either the military and/or peace corps. The former looks after wild animals and the latter tends to people. Thus, the eternal conflict between military forces and peace corps. This is even after the planet is settled in light and life.

B. The Military Manages Wildlife on a Planet Settled in Light and Life

Summarizing, military organizations are responsible for wildlife – flora and fauna. They must somehow interface with urban civilizations to save animals from homelessness, starvation, injury, etc. They could even work to bring back extinct species. This would be with the aid of the *Life Carriers, Melchizedeks, and a Creator Son*. A perfect example is homeless raccoons.

Now in urban settings they are often considered pests; even the enemy. They are treated as such by some. Methods of extermination include everything from bleach and moth balls to beatings, shootings, rat poison, antifreeze and even electrocutions. This is not the work of golden light souls; quite the contrary. Here, we see habitual sinners, even iniquitous personalities at work.

C. Homesites and Hamlets – Re-introducing the Tribe

The solution is provided by Canadian author Farley Mowat. He put it colorfully during a CBC prime time interview with Pamela Wallin. He said: *“We are missing the tribe.”* That is, people need to network together at the local neighborhood level into ‘*extended families*’. Here, the terms *“tribe”*, *“extended family”* and *“hamlet”* are used interchangeably for simplicity.

Kings and Queens Co-Exist with Presidents Forever

Hamlets are composed of contiguous clusters of *homesites*; one hundred per hamlet. Homes are on residential lots. Homesites are homes with vegetable and/or fruit growing capacities; homes with *officially designated garden lots*. Every homesite has two voters called *elders*.

Thus, every hamlet will have two hundred voting elders. Hamlets exist below the municipal level. They elect *hamlet councils* called *rings*. Municipal councils are composed of mayors and councilors. *Hamlet rings* have the same structure - with *elected ringmasters and ringors*. Hamlet mayors are ringmasters [leaders or chiefs] while hamlet councilors are called *ringors*.

D. Integrating Hamlets into Municipalities via the U.S. Constitution

Now, Canada has [more or less] three levels of government; national, provincial and municipal [city or district]. Hamlets are a fourth - most local - level of government. Groups of hamlets make up *communities or mini-states*; several community mini-states forming a municipality.

Republicanism is the future because it eliminates hereditary leaders, replacing them with elected ones. In addition, it divides governments into three co-equal branches; executive, legislative and judicial. This is the key to good government. Hamlets are integrated into municipalities by applying the U.S. Constitution at the municipal level. It has a bicameral legislative branch.

Thus, municipal councils are divided into *upper* and *lower councils*. The latter is for hamlets. Called the *Peoples' Houses* they are the equivalent of the House of Representatives. People belonging to peoples houses are the ringmasters – perhaps even ringors. Those elected to *upper councils* – *equivalent of the U.S. Senate* – are still councilors; *municipal-* or *mini-senators*.

A point of interest is about separate, coequal executive and legislative [and judicial] branches. This means mayors will no longer be with councilors in council chambers. The U.S. President has an executive White House separate from Congress. Likewise, mayors will have their own **executive white offices** called *Pink Houses*; executive offices separate from council chambers.

E. Mayor and Ringmasters as Commanders-In Chiefs

The U.S. Constitution designates the U.S. President as Commander-In-Chief. Applying this constitution locally, mayors and ringmasters become commanders-in-chiefs for municipalities and hamlets. The military – whatever its role – must always answer to civilian governments.

Here its role is managing wildlife. Thus, a military force in a municipality pursuing wildlife related activities must answer to the mayor of that municipality. The mayor has the right to give the military within the municipality orders. Of course, such orders must relate to wildlife.

Ringmasters are commanders-in-chiefs within their own hamlets. The chief of a military force operating within a hamlet must report to the ringmaster. This ringmaster has the right to give the military orders. Of course, such orders must relate to wildlife activities within the hamlet.

F. Special Status for Ringmasters as Little Kings and Queens

Republicanism is for the future, however, monarchists with their regal, colorful militaries still have of reason to celebrate. This is because of the *special rights of ringmasters*; the *right of trespass* onto private [and public] property to ensure wildlife welfare. Raccoons are the example. They do not respect property lines and cross them to raid restaurant dumpsters, etc.

Ringmasters have the right to follow these animals to protect them from vandals and to ensure their welfare across private [and public] property lines. They have the right to follow such animals onto private/public lands to ensure they do not damage property. They can even follow dangerous animals – lions, tigers and bears – onto properties to ensure the safety of humans.

This special status for ringmasters is not afforded mayors; *ringmasters are distinctive* in this respect. They are somewhat like the kings & queens of antiquity who at one time roamed freely throughout their realms. Somewhat – as long as the objective is wildlife welfare and the related issue of human safety. This explains why *ringmasters are also called little kings and queens*.

G. Ringmasters as Kings and Queens in Constitutional Monarchies

Groups of ringmasters may elect *big ringmasters* also called *big kings & queens*; the latter with rights of trespass too. They may trespass onto private/public properties throughout the groups of hamlets which elect them. Such kingdoms are really constitutional monarchies. That is, property owners and local governments have certain rights in the face of such monarchs.

Ringmasters must give property owners, private and/or public, appropriate prior written notices before entering the owners' properties. Night visits to monitor and protect nocturnal wildlife – and humans - require special prior written notices. Emergencies may require that ringmasters access private/public property [properties] immediately – even without giving prior notice.

This is legitimate provided that such emergencies are bona fide. Afterwards, they must give written notices [waived at the discretion of landowners] listing reasons for the intrusion. It is possible that a ringmaster might overstep his/her own good sense. Thus, landowners may appeal to rings. *Ringmasters can be censured* - in extreme cases recalled - *for inappropriate trespass*.

Hamlets are democracies where ringors and ringmasters are elected. Disgruntled, unhappy landowners, private and public, have the option of campaigning against wayward ringmasters. They can campaign to get more suitable candidates elected ringmasters during hamlet elections.

H. Tribal Leaders Unite the High Country into the Hillman Empire

Gabriel Federation and Project Blue Book ensure an eternal future for ringmasters, kings, queens, emperors, empresses and lions, tigers and bears. The regal, colorful military forces of today's monarchs will serve future elected monarchs as aids-de-camp, animal trainers, veterinarians, etc. Most intriguing is the *High Country* also called *The Hillman Empire*.

Kings and Queens Co-Exist with Presidents Forever

Gabriel Federation Starfleet Command asks that the nations of the High Country – Afghanistan, Pakistan, Tibet, Nepal, Kashmir, etc., – become the Hillman Empire. It will be a vast network of tribal hamlets – called the *Highlands Hamlets*. Local tribes or hamlets will elect tribal chiefs [ringmasters] who will then elect regional chiefs – the *Hillman Empire's big kings and queens*.

They have the option of electing *an Emperor; the Great Ringmaster*. Once the planet is settled in *Light and Life* this monarch will be a wildlife biologist. An equestrian expert, he/she may roam freely throughout the Empire on horseback with *Alexander's Companions*. These are the self-declared *Planetary Prince's* aids-de-camp, horse trainers, communications experts, etc.

The consensus is that republics and monarchies exist forever. Co-existing and yet at the same time in eternal conflict; republics with their people oriented state departments, ambassadors and peace corps. Monarchies will have their wildlife biology departments, commanders and troops.

Then, there will be no more war. This is thanks to state departments and military forces – and everyone else - co-operating via golden light souls. Souls cannot be seen with physical vision, however, the angels see them as glowing humanoids. The conscience is different. It is a mental circuit that electrifies everyone including serial killers. As such it cannot be seen even by angels.

GABRIEL FEDERATION STARFLEET COMMAND BY-LAWS

I. By-Law One - Gabriel Federation Starfleet Command

*The name of this planet is **Gabriel Federation Starfleet Command**. It is the head of thirty-seven planets whose **planetary princes** followed **Lucifer and Satan** into **cosmic rebellion**. As such, it recognizes the concept of criminal insanity: “iniquity” or “vanishing personality control”. The people **are asked** to confirm that habitual sinners can easily become iniquitous; just the way it is.*

II. By-Law Two - Gabriel Federation is Moral Authority Only

*The Gabriel Federation is a **moral authority only** cosmic government. It passes no legislation and enforces no laws - operating on consensus. Whatever the majority decides to do – finally gets done. Governments disappear on planets settled in light and life, people being self-regulating. The key is that the spiritual eyes are ‘annointed’ - **golden light souls** visible to all.*

III. By-Law Three - Gabriel Federation Nationality Comes First

This bylaw trumps the bylaw that requests everyone belong to a hamlet. Everyone is a citizen of a nation first. One has to be a citizen of a nation to be a citizen of a hamlet within that nation. Every hamlet belongs to one nation or another. There can be no hamlets with dual citizenship.

IV. By-Law Four - Every Individual Belongs to a Tribe or Hamlet

*Everyone has a nationality – belongs to a nation. Farley Mowat said: “We are missing the tribe”. No wonder; for millions of years people survived by belonging to tribes. People are asked to join tribes or hamlets – even carrying **hamlet identification cards**. This is not required in law but rather is a **historical custom**. Hamlets are where public health care is administered.*

V. By-Law Five - Organic Homesites Get Property Tax Credits

*Homes are on residential lots. Homesites are homes with garden lots [one hundred homesites make a hamlet]. Thus, a homesite is a hamlet property that produces food. There are automatic tax dividends for homesite property owners producing **organically grown** fruits and vegetables.*

VI. By-Law Six - Monarchists Celebrate Hamlet Chiefs’ Right of Trespass

***Project Blue Book** calls this planet a ‘**life modification sphere**’. Thus, hamlet ‘ringmasters’ have the right of trespass to monitor - and even save wildlife. Ringmasters may elect ‘great-ringmasters’ also called kings. Kings may elect the emperors – ie., the **Hillman Empire**.*

VII. By-Law Seven - States Rights to Count Heads

*States must help the poor. Thus, they have the right to count heads to ensure adequate food for all within their borders. A state should know – even second by second – its own population. This means people crossing state lines are asked to punch in/out via **hamlet identification cards**.*

VIII. By-Law Eight - Five Years Public Service for Everyone

*Every adult is asked to serve five years in either the military and/or peace corps. The former takes care of wild flora and fauna and the latter tends to people. Thus, the **eternal conflict** between the military and peace corps. This is even after the planet is settled in light and life.*

IX. By-Law Nine - No Institutionalized Lending

*Personal loans are fine; loans from any and all organization are not. Whatever the outcome there should be no interest paid on any loans from either institutions or individuals. Mortgages are no more. Families own their homes and **can never be evicted** because of outstanding loans.*

X. By-Law Ten - Maximum Allowable Human Populations or MAHPs

*MAHPs designate the ideal number of people for a state, country, nation, continent and even the planet. They are determined by a two thirds majority of voters. Some day, two thirds of the electorate on the planet may arbitrarily suggest a planetary population of **1.5 billion**. The people of the continental United States could arbitrarily vote for a population of **sixty million**.*
